

S & J

ENTRANCE AND WINDOW SPECIALISTS

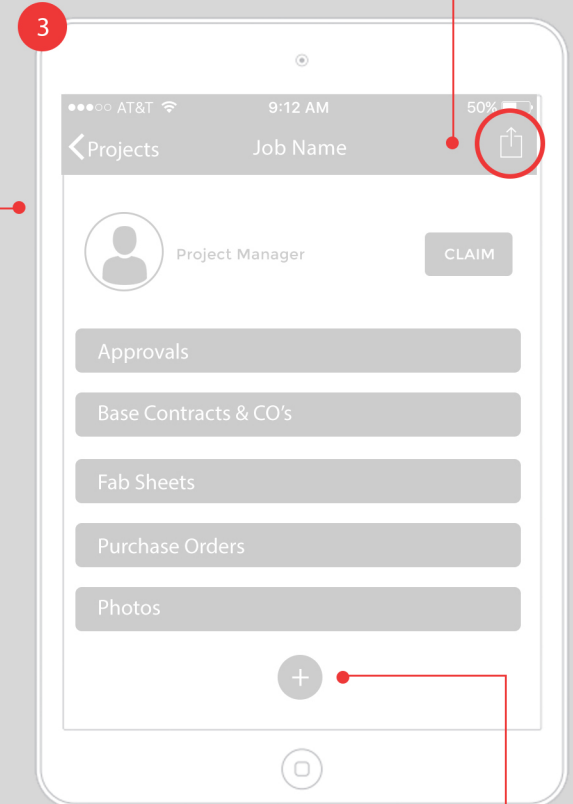

Welcome Screen

To open a job, the user must begin to type the job name or number in order to find it.

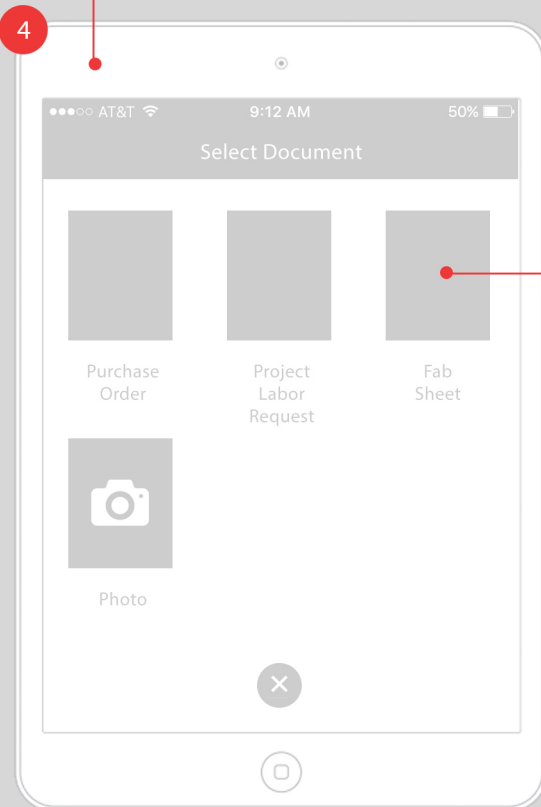

Project List Screen

As the user begins to type, the possible projects begin to appear in list form.

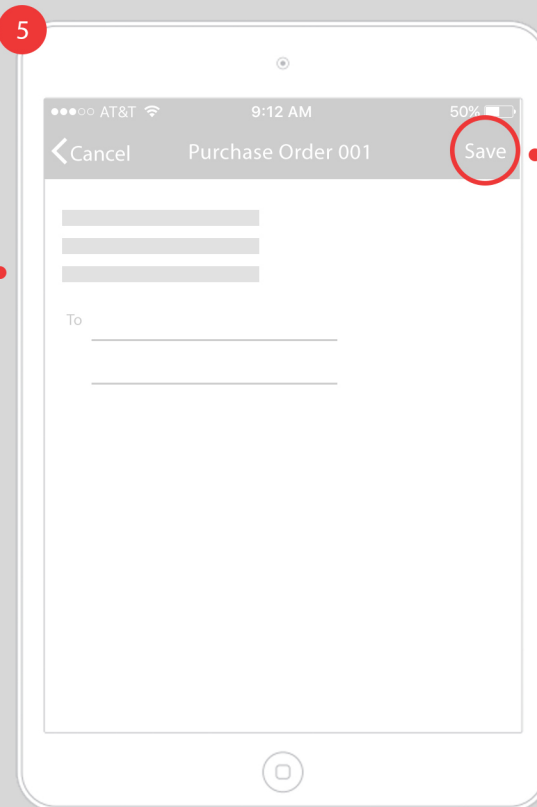

View Project Screen

This is where all the documents pertaining to a job are accessed. Archiving the project will move the entire job to a separate folder in Google Drive. Add button on the bottom will allow for user to add a templated document that will be edited using the stylus. Tapping the claim button will allow for the project to be assigned to Project Manager for other team members to view.

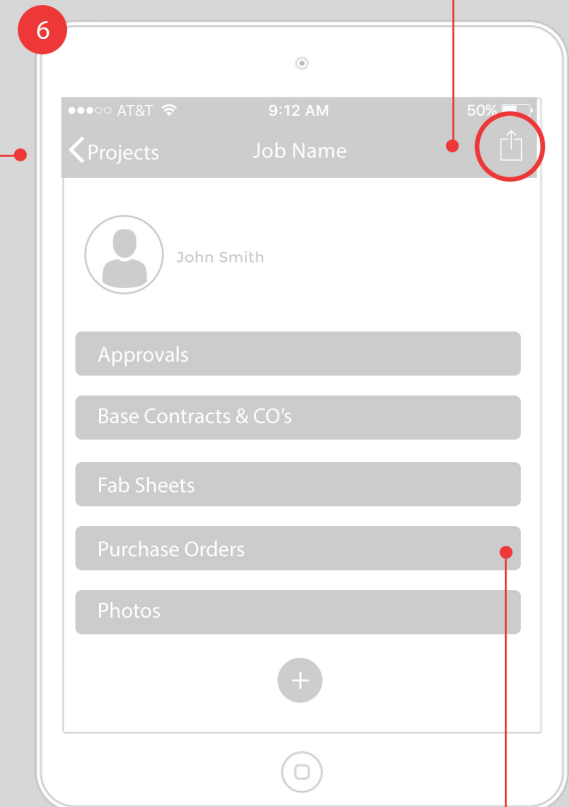

Add Document Screen

The available documents listed here are preset (templated documents) that serve as the creation of a new file to be added to an existing project. Each documents will have a preset location (folder) in which they will be stored in. Once selected, user has ability to edit document by using stylus. Tapping 'x' will revert back to previous screen. Tapping the photo icon will prompt user to either take new or upload photo.

Edit Document Screen

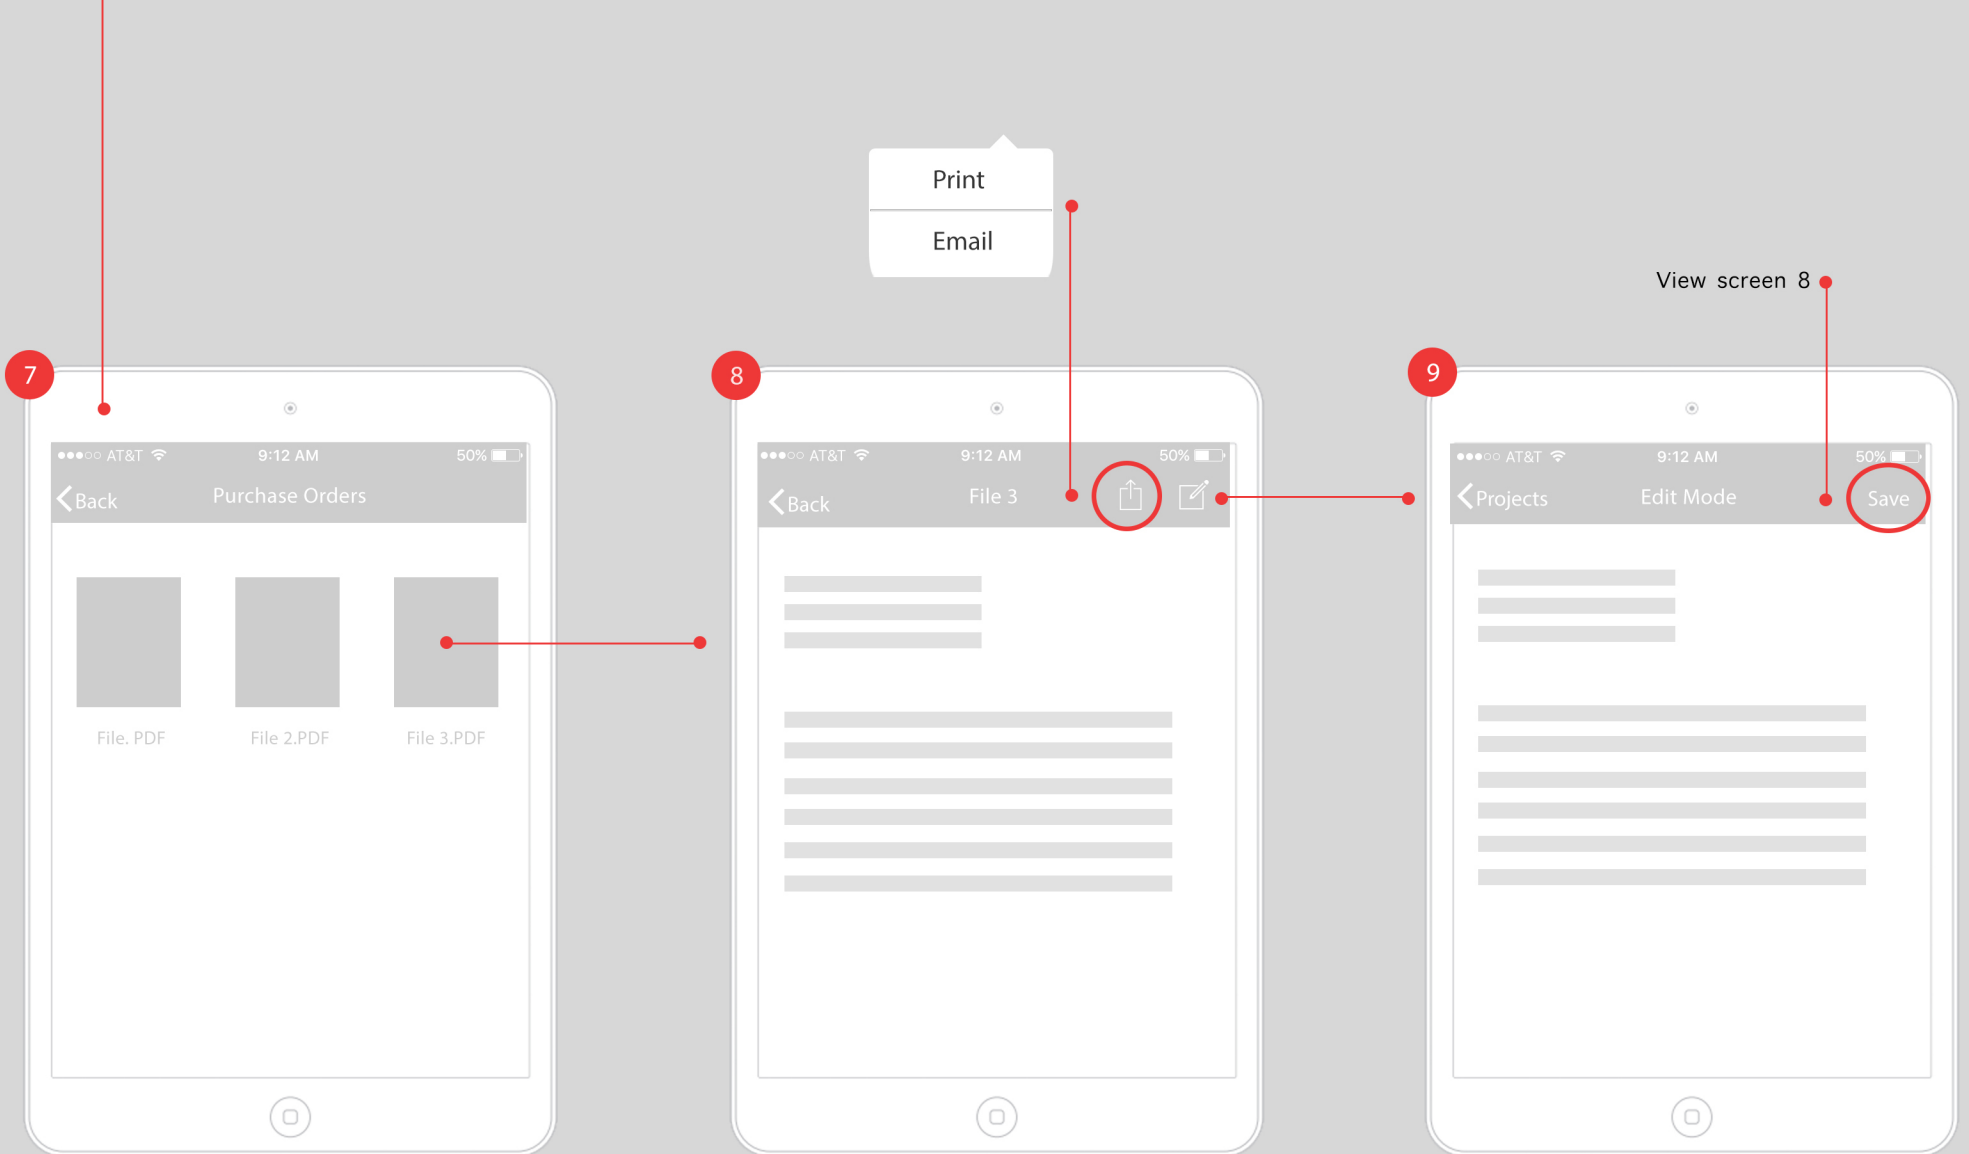

Here the selected documents are entirely editable using a stylus. As the user is editing, the file will auto save as edits are being made in real time. Once completed, the save button is tapped for the file to be stored in a preset location. Same rules apply for all documents. Selecting cancel will revert back to previous screen. Tapping save will send user to view project screen.

View Project Screen

This is where all the documents pertaining to a job are accessed. Archiving the project will move the entire job to a separate folder in Google Drive. Add button on the bottom will allow for user to add a templated document that will be edited using the stylus.

Note: Job shows as claimed by displaying the project managers name.

View Folder Screen

All the files that have been saved to the respective folder will be listed and accessed here in grid format.

View File Screen

File is viewed here. User has option to print a hard copy of document back at the office or email document using Gmail by tapping share icon OR edit the file by tapping the compose icon.

Editing Screen

By tapping on the compose button on screen 9, the user can edit by writing anything they want using their stylus. Tap save in the top right corner and all edits will be permanently applied to that file. After hitting save user will be directed to the prior screen (screen 8).
